Press release 24 August 2022

## Breaking ground in Flemingsberg

On 24 August 2022 we broke ground for Alfa Laval's new site in Flemingsberg. The visions were presented for the new building, the site itself, and the new business district being developed by Fabege and Huddinge municipality.

Alfa Laval's new site will be developed in close collaboration with Fabege with focus on people, location and technology to enable new ways of working. Identity, technical innovations and sustainable solutions have been at the forefront in Alfa Laval's search for the right location for its 700 employees.

Sammy Hulpiau, Site Manager Alfa Laval Tumba Flemingsberg, opened the event by presenting the visions for Alfa Laval's new site that will house modern, inspiring offices, a high-tech laboratory for development and testing of products, and an innovation centre for separation technology. He told us that "It all started in the Stockholm region 139 years ago when Gustaf de Laval founded Separator AB. The company moved to Tumba in 1962 and now, 61 years later, we are breaking ground here in Flemingsberg to build our future home for the next several decades. The new site will be inaugurated in 2025."

Stefan Dahlbo, CEO at Fabege told us about the collaboration with Alfa Laval and continued with the visions for Stockholm South Business District being developed in collaboration with Huddinge municipality. This is one of the largest urban development areas where we visualize that 50 000 will work, 50 000 will live and 50 000 will visit in the future.

Daniel Dronjak, Chairman of the municipal board in Huddinge described how "We are on our way to creating a modern and sustainable city of the future with many residents, visitors and workplaces. If we succeed, we will be part of fundamentally changing the region. We will break the pattern of living in the south and working in the centre and north of Stockholm. In the future, this will be a place to thrive and develop – a place where time spent in rush hour traffic is instead time spent with family and friends. A place where working life and family life are in balance."

Sven-Erik Österberg, Governor of Stockholm stated that "we continue to launch Stockholm as the capital of Scandinavia and as a very important and attractive region for new investments, high quality in living and top-class education. We in Stockholm and I, as Governor, are very proud that we have this new site here and can be a part of Alfa Laval's great history and future."

## Alfa Laval broke ground in Flemingsberg on 24 August 2022

Representatives from Alfa Laval and Fabege set the shovel into the soil to officially break ground at the new site. Nibbles and drinks were served to celebrate this milestone with employees, future neighbours, and collaboration partners.

The official ground-breaking by Governor Sven-Erik Österberg, Sammy Hulpiau, Site Manager Alfa Laval Tumba/Flemingsberg, Daniel Dronjak, Head of Huddinge Municipality and Stefan Dahlbo, CEO Fabege

## This is Alfa Laval

Alfa Laval is a world leader in heat transfer, centrifugal separation and fluid handling, and is active in the areas of Energy, Marine, and Food & Water, offering its expertise, products, and service to a wide range of industries in some 100 countries. The company is committed to optimizing processes, creating responsible growth, and driving progress to support customers in achieving their business goals and sustainability targets.

Alfa Laval's innovative technologies are dedicated to purifying, refining, and reusing materials, promoting more responsible use of natural resources. They contribute to improved energy efficiency and heat recovery, better water treatment, and reduced emissions. Thereby, Alfa Laval is not only accelerating success for its customers, but also for people and the planet. Making the world better, every day.

Alfa Laval has 17,900 employees. Annual sales in 2021 were SEK 40.9 billion (approx. EUR 4 billion). The company is listed on Nasdaq Stockholm.
