Press invitation

Onsdag den 24 augusti
kl. 10.00-12.00
Regulatorvägen 31 in Flemingsberg

Welcome to press meeting in connection to the ground-breaking
On **24 August 2022** we will break ground for Alfa Laval's new site in Flemingsberg. We would like to celebrate this milestone together with employees, future neighbours, and collaboration partners.

At 10:00 we gather to hear more about the visions for the new building, the site itself, and the new business district being developed by Fabège and Huddinge municipality before we set the shovel into the soil and officially break the ground. Nibbles and drinks will be served to celebrate the event.

Speakers:

Sammy Hulpiau, Site Manager Alfa Laval Tumba Flemingsberg
Stefan Dahlbo, CEO Fabège
Daniel Dronjak, Chairman of the municipal board in Huddinge
Sven-Erik Östberg, Governor of Stockholm

There will be opportunities for interviews on location.

In 2025, Alfa Laval's new building will house modern, inspiring offices, a high-tech laboratory for development and testing of products, and an innovation centre for separation technology.

Alfa Laval's new workplace and the high-tech innovation centre will be developed in close collaboration with Fabège with focus on people, location and technology to enable new ways of working. Identity, technical innovations and sustainable solutions have been at the forefront in Alfa Laval's search for the right location for its 700 employees.

Flemingsberg is one of the largest urban development areas and in the vision, 50 000 are employed, 50 000 live and 50 000 visit the area in the future.

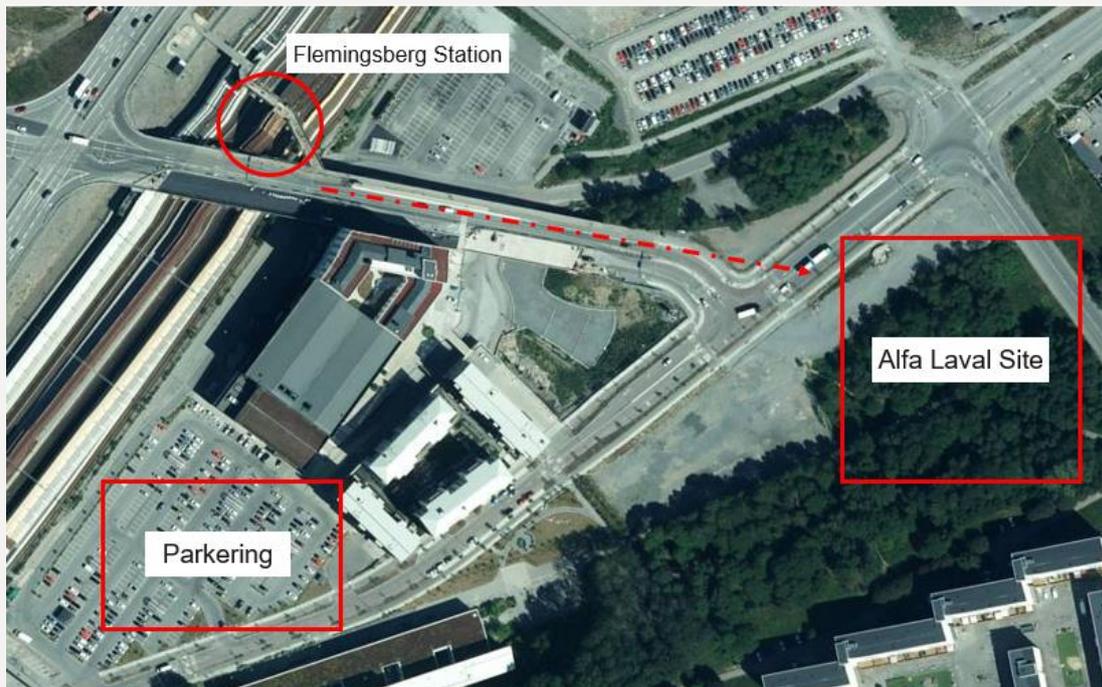

Pressinbjudan Spadtag i Flemingsberg 24 augusti

Alfa Laval's new site is located on Regulatorvägen 31, a 5 minute walk from Flemingsberg station. From the north station entrance (at Björnkullavägen), you turn right across the bridge Regulatorbron to reach the site. Parking is available at ICA Maxi.

For more information and to sign up for the event (by 18 August):

This is Alfa Laval

Alfa Laval is a world leader in heat transfer, centrifugal separation and fluid handling, and is active in the areas of Energy, Marine, and Food & Water, offering its expertise, products, and service to a wide range of industries in some 100 countries. The company is committed to optimizing processes, creating responsible growth, and driving progress to support customers in achieving their business goals and sustainability targets.

Alfa Laval's innovative technologies are dedicated to purifying, refining, and reusing materials, promoting more responsible use of natural resources. They contribute to improved energy efficiency and heat recovery, better water treatment, and reduced emissions. Thereby, Alfa Laval is not only accelerating success for its customers, but also for people and the planet. Making the world better, every day.

Alfa Laval has 17,900 employees. Annual sales in 2021 were SEK 40.9 billion (approx. EUR 4 billion). The company is listed on Nasdaq Stockholm.
