

Remote Boiler Pressure Part Inspection at zero cost

Periodic inspections of your boiler or waste heat recovery (WHR) system are a smart way to handle preventive maintenance and protect uptime against common failures. This is especially true when it comes to boiler pressure parts. The information provided can be used to take corrective actions, but also to optimize maintenance schedules for performance and reliability.

Alfa Laval is now launching a new – free of charge – Remote Boiler Pressure Part Inspection where we visually inspect your boiler or WHR system with assistance from the vessel's crew. All it requires is internet access and a smartphone, tablet or computer to conduct the assessment with.

How does it work? We send you a link with a thorough guide, explaining in detail how to visually inspect your boiler – and what you should look for especially. The link will give you access to a step-by-step template, where you submit pictures and fill in comments under each point. Naturally, our supervisors will be ready to support you from their local office if any questions should arise during the inspection process. Upon completion, the template will automatically be submitted to our experts for evaluation of the findings.

For more information about this service, contact your local Alfa Laval office.

What will you receive?

- A visual assessment of your boiler – free of charge
- An overview of important findings
- Recommendations for corrective actions, improvements or upgrades

Benefits

- Easy and cost-free evaluation of your boiler's condition
- Reduced risk of breakdown or even off-hire
- Prolonged boiler lifetime
- Suggestions for improvement

Inspection

We can inspect boiler and waste heat recovery systems of any type, but this offer includes only standard marine boilers and waste heat recovery systems produced by Alfa Laval.

Pricing

Free of charge, regardless of location

Valid until 1st January 2021.
